

## TRAFFIC CALMING WORKING PARTY REPORT (OCTOBER 2013)

- £10,000 funding for traffic calming consultancy project with HBA granted by WSCC in last Monday's meeting of the North Chic CLCommittee.
- Very encouraging to receive great support for the scheme from all Committee members, as a lead project for WSCC on traffic management/road calming.
- Big thank you subsequently given to Gordon McAra and Fiona Baker and team at WSCC for their support in facilitating the shift from £60k crossing project to fund this consultancy.
- Further, CLC members expressed a desire to implement this project on completion so we are optimistic about 2016/17 or possibly even earlier. RATA must ensure consultants work closely with WSCC Highways which I have already confirmed to Fiona Baker.
- Complimentary articles in the press already and more to come.
- One outstanding item is to attract SDNPA interest in the project too; this is in hand
- Next steps: meet HBA 15<sup>th</sup> Oct to set out programme of works; confirm budget incl expenses; discuss possible open meeting to initiate project.

### Other matters:

- Rake: proposal for use of traffic speed reminder (TSR) device in Hill Brow and at Bull Hill junction.
- Apparently a Rake resident known to the clerk of Liss Council has asked if Rogate could use its TSR device here. LissPC is meeting to discuss.
- Needs to be cleared with Highways (risk assessment): we must inform our insurers. Note: the device could be used in other locations which residents are concerned about: eg. Wenham, ANO?
- Provisional cost maybe £300 for equipment + ? training for the people we need to provide. We have no budget as such.
- To resolve: should RATA with LissPC agree to go ahead? Spend this year or budget for next year?
