

10) Council address information -

- Clerk has contacted the hall but the old YC room is not available for PC sole use (and is likely to incur commercial rent if it were) but they are willing to consider us having priority use.
- They have estimates to completely refurbish at a cost of £9,000 approx. At the moment this cost is not their priority.
- They have kindly offered use of their post-box to enable use to use the address – discussions continue.

11) Defibrillator for Terwick Rise – MH.

12) Hillbrow TRO application update – AC.

13) Rogate Village Community Highways Scheme update – Good news!

- This was considered by WSCC as part of this year's programme for proposed highways improvement works. The process is a 'prioritised approach' where community requests are considered by assessment against a pre-determined scoring matrix and the resulting scores are prioritised to establish a forward programme for this work stream.
- The application for a 20mph zone in Rogate Village has been successful – we were informed just before Christmas.
- The expected timeframes are that the potential scheme should be designed in 2024/25 with potential construction 2025/26. However, progression will be subject to factors such as feasibility assessments, detailed design, final budget allocations and programme approval. Some schemes of a more complex nature, which involve a greater degree of public consultation or legal orders may need to be constructed in subsequent years.

14) Rake tennis club grant application – we have received a request for a grant of £1,000 towards their tennis court resurfacing. The total cost is approx. £16,000 with most of it being met by their funds though they are also making grant applications to EHDC and Liss PC. They do not charge for use of the courts which are available to local residents.

Note: we awarded £600 to Rogate Tennis Club in 2021.
